## F.D.S. Disposal Inc.

### WASTE SERVICES PROPOSAL

Residents of Pine Ridge

F.D.S. Disposal Inc. would like to offer the residents of Pine Ridge the opportunity to participate in our single stream curbside recycling program. We are currently offering this recycling program in the following communities, The Villages of Citrus Hills, Black Diamond, Villages of Sugarmill Woods, Chassahowizka and Riverhaven.

Our single stream recycling program allows the customer to mix all their recyclables into one container, and place curbside for collection. No more separating of your recyclables into different containers, and driving them to the drop off center, just place them into one container for once a week curbside collection. Single stream recycling is increasing recycling rates and participation across the State, and nation due to the ease of the program. Please see attached list of acceptable recyclables for your review, also please watch our recycling video at [www.fdsdisposalinc.com](http://www.fdsdisposalinc.com) for more information.

The importance of recycling in our community cannot be over stated, recycling will help conserve our landfill space postponing the need to transfer garbage out of County at increase cost to the citizens of the County. Recycling helps conserve our natural resources, including water, trees, energy, and helps reduce our dependence on foreign oil. The Florida recycling industry provides 32,000 jobs, with a 765 million payroll, and contributes 60 million dollars of tax revenue to the State. As of this date our participating communities have diverted 660,000 pounds of recyclables out of the Citrus County landfill for processing.

To create a sustainable collection program each customer will receive once a week household waste collection, and once a week yard waste collection at a bundled price of \$56.70 per quarter for the Association. The United States Environmental Protection Agency estimates that 60% of the current waste stream is recyclable, Florida's new recycling goal of 75% by 2020 prepared by the Florida Department Environmental Protection, will soon be considered by the legislature for action. FDS Disposal Inc. would like to offer this new collection program to the residents of Pine Ridge, and have you join the other participating communities in Citrus County helping to make a difference in our environment. Please contact me with your questions, or with your desire to participate in our bundled recycling collection program.
